### **Hands-On Classes Being Held In Major Cities Around The United States**

**Tallahassee, Fla. – June, 2007–** GTO, the makers of the GTO/PRO professional series of swing and slide gate openers, is continuing with its highly detailed Outreach Training program.

Originally, the classes were held at the GTO/PRO facility in Tallahassee, Fla. But now more installing dealers are being trained in GTO/PRO classes held in major cities around the country.

GTO recently held an Outreach Training class in Memphis, Tenn. The Memphis class, with 28 students, was held by Trina Jackson, a GTO/PRO specialist.

“Our comprehensive GTO/PRO technical class teaches professional installers and repair specialists everything they need to know to meet or exceed customer expectations by completing a job efficiently,” said Brad Hollis, GTO/PRO director of sales. “By holding the classes around the country, we’ve made it easier for students and trainers to get together.”

Upcoming classes for 2007 have been scheduled in Portland, Ore. (July 17), Sacramento, Calif. (Sept. 25) and Atlanta, Ga. (Oct. 10).

The training classes are designed for anyone involved in the gate operator industry including sales, service or installation personnel.

The one-day class is geared to basic and advanced levels of installation, troubleshooting and repair of all GTO/PRO products and accessories. Class size is limited so that each student receives personalized attention.

More information about reserving a seat for an upcoming class can be found by visiting GTO/PRO’s website at [www.gtopro.com](http://www.gtopro.com) or by calling the GTO/PRO sales team at (800) 543-4283.

There is no fee to attend a class; a deposit is required to reserve each seat, which is fully refundable upon successful completion of the class.

GTO/PRO classes include trouble shooting, servicing, UL 325 safety procedures, and installation training on the entire line of GTO/PRO gate operators and accessories.

Upon successful completion of the course students receive a certificate to be displayed in their office for customers to see.

## **About GTO: Celebrating 20 YEARS of Innovation**

Founded in 1987, GTO, Inc. is an American manufacturer and leading provider of turnkey access control system solutions for residential, commercial and industrial applications. GTO manufactures and distributes automatic gate operators and accessories for single and dual chain link, farm tube, panel, vinyl, aluminum, wood and ornamental wrought iron fence gates throughout the world. GTO/PRO automatic gate operators, made for every type of application, work in rural, urban, commercial and industrial environments.
